

Corporate portfolio

A&P Industriemontage GmbH & Co. KG | Felix-Wankel-Straße 8 | D-59174 Kamen

A&P Industriemontage GmbH & Co. KG - Your trusted partner for worldwide industrial assembly.

Our services :

**Project Management
Plant disassembly and reassembly
Machine Relocation
Electrical Engineering
Assembly personnel
Industry 4.0 Automation
Steelwork and cabins
Safety inspections**

The Company

We have been offering you professional support at both a technical and personnel level with our installation and services since 2004.

With 85 employees at 3 locations, we take the strain off your projects, saving you valuable time and therefore money. Our experience speaks for itself.

Certificates

TÜVNORD

Certificate

Management system as per
DIN EN ISO 9001:2015

The Certification Body TÜV NORD CERT GmbH hereby confirms as a result of the audit, assessment and certification decision according to ISO/IEC 17021-1:2015, that the organization

A&P Industriemontage GmbH & Co. KG
Felix-Wankel-Straße 8
59174 Kamen
Germany

operates a management system in accordance with the requirements of DIN EN ISO 9001:2015 and will be assessed for conformity within the 3 year term of validity of the certificate.

Scope

Project management, pre-assembly and final assembly of machines, industrial plants and assemblies, disassembly and reassembly of machines, plants and operating equipment, electrical engineering and switch cabinet construction as well as commissioning

Certificate Registration No. 44 100 241:36
Audit Report No. 3537 5306

Valid from 2024-08-26
Valid until 2027-08-25
Initial certification 2024

Use the database to verify the validity of this certificate.

Essen, 2024. 08. 26

Project management

Reliable project management - your experts for planning, quality and contracts

The realization of complex projects is based on reliable adherence to deadlines, performance and budgets. Our realisation process is therefore based on the targeted implementation of coordinated and detailed project phases. A&P project managers ensure that these are adhered to on site.

Project Management:

- Process planning
- Capacity planning
- Progress control
- Assembly monitoring

Quality monitoring:

- Assembly control/monitoring
- Welding monitoring/supervision
- Performance test (e.g. pressure test)
- Assembly inspection
- Acceptance test
- Documentation

Contract management :

- Creation/compilation and management of all contracts including revision service

Disassembly and reassembly

Your plant assembly and disassembly professionals

We dismantle and transport your machinery and equipment and reassemble it completely at the new location. With A&P Industriemontage GmbH you get a service tailored to your needs.

Our services include:

- Complete mechanical, hydraulic and electrical Disassembly, reassembly and new assembly of machines and systems of all kinds
- Assembly of complete factory or production systems
Pre-assembly of gantries, production systems, special machines
- Overhaul measures, modernisation
- Alignment, calibration
- Cleaning
- Production support

Services provided by our partners:

- Packaging
- Transport and freight handling
- Logistics

Machine relocation

Relocate capital goods safely with professional machine relocation

We also offer the most suitable solutions for the relocation and installation of machines and/or machinery. Our project managers have many years of experience in the relocation and installation of machines and/or machinery throughout Germany, Europe and the rest of the world.

A&P Industriemontage takes care of the entire relocation process.

- Project management from A-Z
- Actual state analysis
- Documentation
- Customs clearance
- Logistics, logistics planning, calculation
- Dismantling, packing
- Transport route preparation
- Transport
- Layout outline, drawing, sketch
- Reassembly
- Conversion measures, extensions
- Production support

Electrical Engineering

Fast and reliable processing of your electrical engineering projects

Today, a modern electrical and IT infrastructure is more important than ever. Save yourself downtime and delays caused by staff shortages or outdated electrical installations.

Whether new construction, retrofitting or expansion of an existing system, we are also professionally positioned in the field of electrical engineering and are your competent partner for repair measures, (machine) relocations, new buildings and maintenance measures. Our range of services includes installation work, wiring work, MSR technology, robot technology and commissioning support.

Our qualified electrical fitters work hand in hand with the mechanics, depending on the requirements. We draw on our global experience from almost all areas of the industrial value chain. Strategic planning and the rapid and thorough realisation of your projects is our top priority.

We would be happy to advise you on your project.

Assembly personnel

Qualified assembly personnel for your large-scale construction projects – worldwide

On construction sites, every delay costs money. Nobody can afford - even short - waiting times. Especially in large construction projects, every trade must work reliably hand in hand. The high, continuous quality of the work to be carried out is particularly important in plant construction. That is why it is important to be able to call on qualified installation personnel in every situation, should personnel unexpectedly become unavailable. We have highly qualified, reliable and quickly deployable assembly personnel for you. At any location! Our services are of consistently high quality thanks to strict selection procedures and many years of experience.

This means we can guarantee you qualified and suitable personnel for your installation work, who are paid in accordance with the guaranteed collective labour agreement.

Automation Industry 4.0

Production automation with a strong partner

Together with our automation partner for Industry 4.0, we support leading mechanical engineering companies in solving digital challenges in their core business and developing concepts with a wide range of control systems.

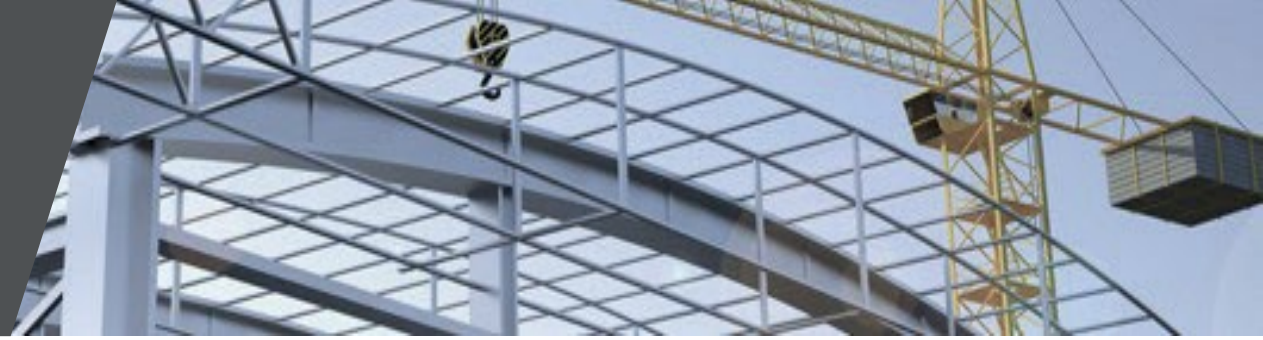

We realize individual automation solutions with our own control cabinet construction, electrical installation and a high level of expertise in hardware planning and software programming of control technology for automation systems of all kinds. In addition to highly trained electrical and software engineers, our team also includes experienced mechanical designers. Combined with our in-depth experience in the field of mechanics, we are able to offer complete solutions consisting of mechanical and electrotechnical components.

Unsere Leistungen:

- Project planning
- Electrical design
- Switch cabinet construction
- Electrical assembly
- Software development
- Robot programming
- visualization
- Virtual commissioning
- Commissioning
- Process control systems
- Special machine construction
- Services in Asia / China
- Retrofit / plant expansion

Steel construction and cabins

Expertise in steel construction and cabin assembly

Do you need support for the final assembly of steel structures or cabins?

We don't just take on heavyweights in mechanical engineering. We assemble all parts into a complex end product.

Our assembly services:

Steel construction:

- Project planning
- Electrical design
- Switch cabinet construction
- Electrical assembly
- Software development
- Robot programming
- visualization

Cabins:

- Virtual commissioning
- Commissioning
- Process control systems
- Special machine construction
- Services in Asia / China
- Retrofit / plant expansion

Safety checks

We inspect your systems

We offer you professional safety inspections in accordance with the DGUV guidelines, which are carried out by our certified specialists. With our comprehensive inspections, we ensure that your work equipment, machines and systems meet the highest safety standards and that your employees are optimally protected.

Our inspections not only offer you the necessary legal and liability security, but also make a significant contribution to avoiding accidents, increase efficiency and minimize operational downtime.

After each inspection, you will receive comprehensive documentation and a certificate confirming compliance with legal requirements.

Enzo Simeonidis

Safety officer

Tel. +49 170 7362333

e.simeonidis@ap-industriemontage.de

Safety checks

- **Inspection of fixed steel shelving systems** by authorized persons in accordance with the current DGUV safety regulations.
- **Inspections of ladders and steps** in accordance with DGUV Information 208-016 to ensure the safety of your access equipment.
- **DGUV V3 inspections** of your electrical systems by qualified electricians for specified tasks (EFKffT), who ensure regular inspections to the highest standards.
- **Inspection of personal fall protection equipment (PSAgA)** in accordance with DGUV principle 312-906 to guarantee the safety of your employees when working at height.
- **Certified testing of hoists, cranes and load handling equipment** by TÜV SÜD-certified experts in accordance with DGUV principle 309-001.
- **Certified testing of lifting platforms** by TÜV SÜD-certified experts in accordance with DGUV Rule 100-500.

Project realization

Worldwide projects - trust across continents

e.g. USA - Mexico - Costa Rica - Iran - Hungary - China - South Africa - India - Thailand - Portugal - Spain - France - Netherlands - England - Sweden - Puerto Rico - Poland - Tunisia - Belgium - Brazil - Russia etc.
